EXPERIENCE

Tracecost - Cyber Security Analyst Intern

2021

- Efficiently improved the company's application security by securing its database such as hashing stored passwords, limiting grants & permission, and restricting MySQL port access from untrusted networks.
- Accurately minimized the company's performance risks by conducting API Load Testing using JMeter and Java JDK
- Proactively learned systems within the AWS platform for easy management by learning the company software architecture
- Attended regular instructional meetings

ReTrain Canada — Cyber Security Student

March 2021 - May 2021

- Safely practiced analyzing, correcting, modifying, porting, and cross-compiling code for public exploits
- Conducted remote and client-side attacks through various established and novel techniques to determined vulnerabilities
- Performed penetrations tests on various machines using different applications such as Kali Linux, VMware, Nmap, Netcat, Metasploit, Exploit Db, BurpSuite, Nessus, Buffer Overflow, XSS and SQL Injections
- Practiced and carried out privilege escalation techniques when needed

Milo Production Inc, Edmonton — Software Developer

December 2020 - May 2021

- Extended company's global market feasibility by developing multi languages features using Python's internationalization
- Improved code readability of the main product by setting up Git pre-commit to enforce code styling
- Increased user satisfaction and mobility by developing offline video feature that enable user to download videos
- Redesigned, centralized and organized the library folder to improve developer efficiency and code readability

Helen Knight Consulting, Calgary — Software Developer Intern

September 2020 - October 2020

- Developed fully functional user registration form using Javascript, Firebase and integrated Stripe payment gateway.
- Created interactive landing pages for resources and registration sections of the project using HTML, CSS and Javascript.

Making Changes Association, Calgary —Software Developer Student

April 2020 - September 2020

- Developed a fully functional registration form for local dance studio using Javascript, HTML, and CSS during Capstone Project
- Practiced programming skills by solving daily challenges and building projects.
